The NSB UPS Battery[®] is ideal for use in a range of applications, including datacenters, industrial, energy storage, and UPS applications.

- Performance excels at high rates of discharge and recharge
- Pure lead electrochemistry greatly increases temp and corrosion resistance, while reducing component aging
- Thin plates deliver large surface area, high power density and low resistance
- Design life 15+ years at 20°C (68°F)
- EUROBAT design life definition: Very Long Life (12+ years)
- High energy density
- Operating temperature range -40°C to +65°C (-40°F to 149°F)
- State-of-the-art automated manufacturing ensures consistency and reliability
- Unmatched quality control and construction techniques ensures long life and optimal performance
- Shelf life of up to 24 months
- Advanced 3 stage terminal design to ensure leak-free operation - brass terminals provide maximum performance
- High modulus Polyphenylene Oxide (PPO) plastic materials designed to withstand extended elevated operating temperatures and maintain high battery compression essential for reliable operation
 - Non-halogenated, thermally sealed plastic casing
 - Flame retardant (UL 94 VO) and LOI of at least 28%
- Front access terminals ensure ease of installation and maintenance
- Approved as non-hazardous cargo for ground, sea, and air transport - DOT 49CFR173.159(d), (i) and (ii)

Our solutions multiply battery lifetime and reduces energy consumption, delivering significant savings in operator OPEX and CAPEX due to fewer battery replacements and maintenance visits. Other benefits include:

- Reduced environmental impact
- Premium construction materials
- Integrated data com available
- High safety standards
- Integrated BMS platform standard
- Wide range of cabinet colors
- Low maintenance design
- Integrated breakers and fuses

Below is a front terminal sizing example, compared to a monoblock system.
