

NorthStar ACE[®] IQ

Intelligence on the Move

Transportation Applications

NorthStar ACE[®] IQ puts you in the driver's seat. Never again will you have to worry about your car or boat not starting due to poor battery conditions. With the introduction of NorthStar ACE[®] IQ, you will have complete control of your batteries and obtain a peace of mind knowing they won't fail you.

Stay in control with NorthStar ACE[®] IQ

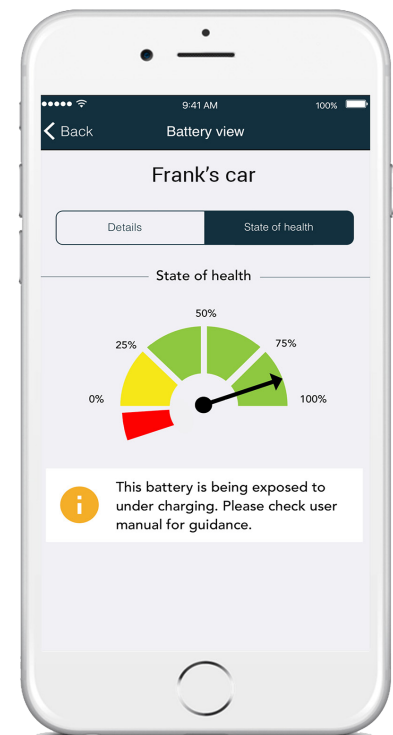

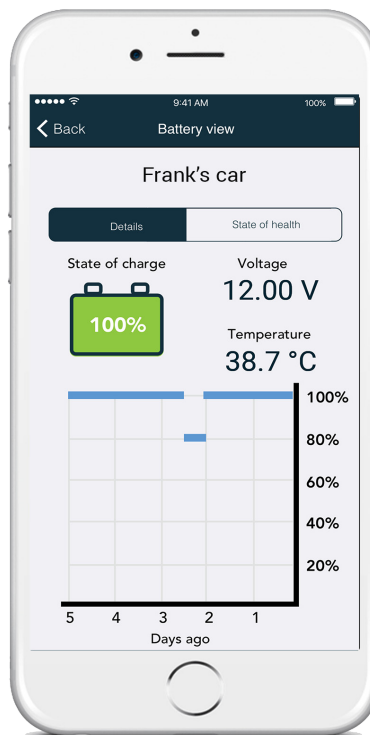

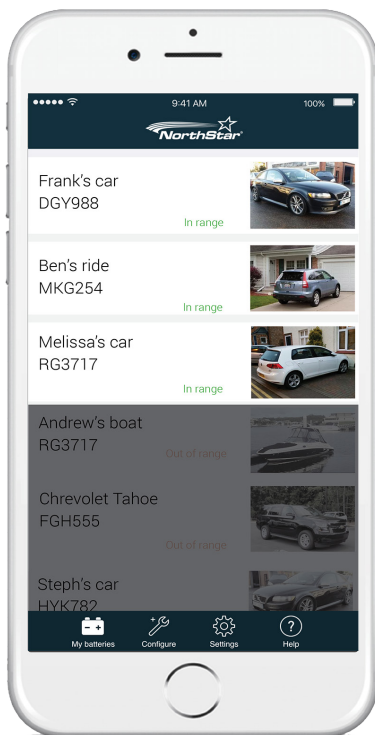

Battery care and maintenance has never been so easy. NorthStar ACE[®] IQ allows you to continuously monitor the batteries' state of charge and health, preventing unnecessary battery failure and maximizing performance.

NorthStar ACE[®] IQ provides you with everything you need to know about your batteries.

Instant overview of all configured vehicles and batteries, indicating the ones in range.

Battery voltage and temperature readouts and statistics on your batteries' state of charge.

Information on your batteries' health and recommendations on how to get more life out of your batteries.

How it works

With NorthStar ACE® IQ you can configure your batteries and gain access to significant performance data in no time. Detailed information about the state of charge, state of health and additional usage conditions will be available in the palm of your hands within minutes.

Communication at its best

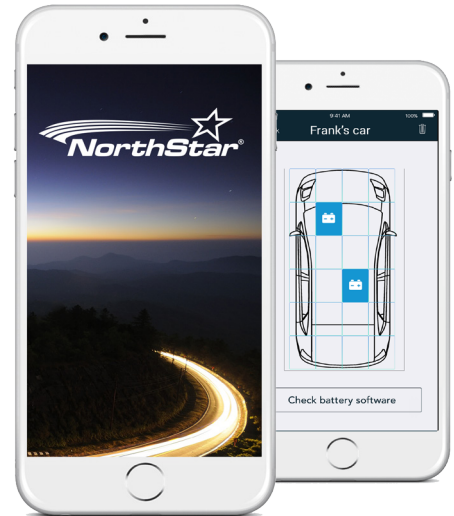

NorthStar ACE® batteries are equipped with an integrated chip with a sensor using Bluetooth Low Energy (BLE) connection. The batteries communicate with the NorthStar ACE® IQ App enabling you to remotely, at a distance of up to 100 feet, check the status of the batteries. The App automatically and continuously syncs data from the battery sensor, ensuring the most up-to-date and accurate information is displayed.

The NorthStar ACE® IQ App is easy to install and supports a majority of Android and Apple devices. The App will be available to download from Google Play and Apple Store early 2018.
